Introduction

- ✓ The launch of Safeswap.online was successful, and many users has the ability to swap and exchange their tokens to different assets based on binance smart chain network (BSC) with safety and ease of mind.
- ✓ With the launch of Safeswap.online staking products many SWAP token users starts to stake their assets to earn on the high APR staking pools provided by safeswap.online with the words stake to earn safeswap.online have achieved what the real means of (STAKE To EARN) words.
- ✓ The support of multiple blockchains (Solana, polygon, Qtum, Phantom, Smartbch, etc.). Providing Liquidity boosters solutions through the lease and lending services. Provide a multiple dimensional staking products, Auto and compounded staking pools. The Fiat abilities for the users through the RAMP integration, via a provider in the market which is European approved and regulated.
- ✓ The virtual NFT's assets ownership markets, that includes the real virtual assets of the non fungible tokens NFT's, Art assets, gaming assets, and other NFT's available of the safeswap.online users to start their own virtual ownership markets.

Vision of SafeSwap

SafeSwap is unique and sustainable and has a great potential to set a new standard in the DeFi industry. By refactoring traditional functionalities from alternative DeFi platforms in combination with fresh new ideas and features that have never been seen among DeFi platforms in the past SafeSwap Online will try to distance itself from available competitors in the market.

The aiming standards of safeswap.finance is to become one of the most unique, safe, secure and easiest to use, decentralized services providers out to its audience and all other users on the cryptocurrency space, using its safe features from swaps to staking and NFT's markets to voting and issue a governance solutions to better scope the Aim for successful in the future of achievements.

ECOSYSTEM OVERVIEW

The SafeSwap finance protocol is a dedicated trading (DeFi based) DEX that allows people to instantly connect with existing liquidity pools. There are several SafeSwap mirrors in order to always secure accessibility. This allows the user to essentially become their own market maker.

The Vision to safely increase the freedom of money globally, in believing spreading that vision in a safe approach, SafeSwap can improve lives all around the world surely but yet safely in a decentralized way, as it's the vision of the current era related to the economic world all around the world, safeswap has achieved way much and more on the way coming to be achieved.

Liquidity providers can yield rewards by provide funding to traders wanting to trade on safeswap.finance, a part of the projected products to safeswap Ecosystem that considered the main product and source of safest income.

SafeSwap currently using the router and factory smart contracts from PCS2 and not collecting any revenue or trading fees. Whatsoever safeswap.online does earn a percentage of the fees from the staking mechanism, SWAP Liquidity Pool and additional features that safeswap.online provide.

- ✓ Backed by BNB
- ✓ Automated Market
- ✓ Incentive Interest
- ✓ Organic Approach
- ✓ Doxed Company
- ✓ High Standard

ECOSYSTEM OVERVIEW

- No pre-sale or private sale. Self funded and sustainable company
- Providing Liquidity to pool pairs feature available.
- Lots of SWAP Staking features and earning pools available.
- Innovative features exclusively for SWAP Token Holders only

- SWAP Token total supply limited at 1,000,000 tokens
- LP Vault Staking features available for SWAP Token.
- Ecological goals achieved via SWAP Tokens
- Ongoing growth of the business development

Swap Token is a digital asset that connects the SafeSwap Platform and its underlying functionalities, SWAP token the platform asset that combine between staking and rewards and the official pair token on the safeswap.online platform.

ECOSYSTEM OVERVIEW

4.1 SafeSwap

SafeSwap backed by BNB, in an automated market based on the audited and trusted smart contracts, which gives its users the ability to swap their tokens in a safe environment while maintaining the real decentralization aspects, more over to earn incentivized interests by interacting with its products and services.

4.3 Implementation

With every release safeswap.online implementing new features, more to come to safeswap.online, the safeswap.online contract implemented using the original source from the well-known pancake swap, the aiming to achieve the safest swap and exchanging experience is the first role for implementation on the safeswap.online.

4.2 Use Cases

Swap between tokens on the BSC Binance smart chain network, provide liquidity to tokens pairs and earn incentives as interests from the fee's revenue, stake tokens on the available staking pools to earn staking rewards, stake LP tokens on the available LP tokens pairs pools to earn more rewards from the staking products, check tokens data and charts add favorites tokens to watchlist list.

4.4 SafeSwap Token

Swap Token is a digital asset that connects the SafeSwap Platform and its underlying functionalities, SWAP token the platform asset that combine between staking and rewards and the official pair token on the safeswap.online platform.

Swap Tokens Used at SafeSwap Online Staking & Liquidity Pools

SafeSwap Tokenomics

SWAP Tokens Locked

32.5% of the total supply is locked over the next 10 years, in different pools and different periods.

SafeVault Lock

15% of the Total Supply
150000 SWAP Tokens
31 August 2031 End Date

SafeEarn Lock

7.5% of the Total Supply
75000 SWAP Tokens
1 February 2024

SafeNFT Lock

10% of the Total Supply
100000 SWAP Tokens
Until all NFT's are Minted

SafeNFT Summary

Reward Pool Payout Information

Split Reward among all holders of SAFE NFT

20% of every sale should directly go to the reward pool. Everyone that purchased a Safe nft will from thereon receive a reward in the token they choose as a reward token.

Choose a Reward

Safe NFT Holders are able to select the token they want to receive their reward paid in. On default users will get paid in SWAP but they have the ability to receive their rewards in SWAP or BNB.

Minting in BNB

Pays out to the company in BNB

Minting in Swap

pays the company in SWAP (token).
10% discount on minting with SWAP

Marketplace Whitelisting

Marketplaces should not be able to list Safe NFT without our whitelisting approval. This is important because we want to make sure that we can always guarantee that there is a royalty of 20% for all Safe NFT Holders (at any time in the future even when there is no longer the possibility to mint).

Ability to send NFT from A to B

People of course have the ability to send nft's from wallet A to Wallet B. In this case we want to enforce the gas fee to 40\$ (which 100% goes to the reward pool). The reason why we want this high gas fee when people send out the nft directly without selling it via a whitelisted marketplace is to ensure holders that whatever happens that they are always guaranteed to earn the reward.

The gas fee would not apply on whitelisted addresses.

Minting Prices

Phase 1

1 – 1000
0.05 BNB

Phase 2

1001 – 2000
0.10 BNB

Phase 3

2001 – 3000
0.125 BNB

Phase 4

3001 – 6000
0.15 BNB

Phase 5

6001 – 8000
0.175 BNB

Phase 6

8001 / 1000
0.20 BNB

Rarity Layer

Additional Information

There are multiple sparkle effects, one should always be in front of the safe and the other one should always be behind the safe. SPARKLE effects only occur when the NFT is in the SPECIALS SERIES (7%). A special can still be based on a Common, Uncommon, Rare or Legendary, the only difference is that a SPECIAL is always a HOLO (with the sparkle layers).

Staking

Stake Digital Assets in terms of available pools provided by SafeSwap staking. Single Asset Pools, Dual/Paired Assets Pools, LP Tokens Pools, NFT Assets Pools. Staking Pools are subjects to finish/end or renewed and/or new staking pools created to take. The advantage of most profits and earnings keep following up with Safeswap.finance live channels.

Staking Lock

Staking lock mechanism depends on the staking pool featured by safeswap.finance, when decided to start staking to earn rewards take information of which pool staking to, Major things to keep in mind when staking, Staking pool end time (No of blocks the pools runs before ended), Staking pool lock time, Minimum staking limit & Maximum staking limit.

Staking Reward

Staking rewards mechanism depends on how safeswap.finance provided the staking pool, Manual harvesting rewards or Auto harvesting rewards, when deciding to stake on manual pools rewards harvest must be triggered manually by clicking the harvest button on the DAAP, Auto pools are pools with rewards automatically harvested, to the wallet of each pool participants or Auto combined to the staking amount of each pool participants, [For further info on how pools runs check the staking page from safeswap.finance DAAP]

SAFE EARN / STAKING

Staking Lock & Reward explanation

1. Fresh staked on pool with 3 Days lock time - Staking can be moved (Withdrawn) from pool after 3 Days. [Any attempts to remove staking before lock time ends will fail].
2. Harvested rewards after staking - before lock time ends or after lock time ends - Staking lock time will re-apply after each harvest. [Any attempt to remove staking after harvesting and lock time re-apply will fail until lock time period ends]
3. Raise staking by adding more to pool will re-apply lock time - [lock time does not stak when it's re-applied by functions; it just starts the lock countdown timer]
4. Remove (Withdraw) staking, Automatically Harvest (Withdraws) rewards to the same wallet in function.

Fee Free Staking Pool SWAP Holders

Staking with no (tax) fees for any deposits and withdrawals. SafeSwap decided to create several new (additional staking pools) where SWAP Holders can Stake their SWAP for other token rewards while enjoying 0% deposit fee on staking in these pools.

We will only make this kind of pools for the SWAP Tokens meaning that some of our upcoming pools allow SWAP Holders to stake their SWAP, earn other tokens while they will not lose a single token of their SWAP Stack. An extra utility and a bonus for holders.

The only payment to make, is the payment for the gas fee needed to transfer SWAP to the staking pool you want to use. Stake SWAP earn SWAP, Stake SWAP earn multiple other assets such as MUXE, VICE and many more.

	Earn SWAP Stake SWAP	SWAP Earned 0.0 0 USD	APR 17.12%	 Total staked 18,420 SWAP	Ends in 10,490,048 blocks 	Deposit Fee 0%	Transfer Fee 0%	Withdrawal Lockup 480 Hour(s)	Details 
	Earn MUXE Stake SWAP	MUXE Earned 0.0 0 USD	APR 374.88%	 Total staked 984 SWAP	Ends in 10,490,469 blocks 	Deposit Fee 0%	Transfer Fee 0%	Withdrawal Lockup 72 Hour(s)	Details 

SAFESWAP LIQUIDITY POOL

Provide Liquidity of your owned coins pairs or create your own pools pairs.

By providing Liquidity of the pool pairs chosen and or created Liquidity Pools a LP token will be generated and stored in the wallet performed the action, to withdraw the Liquidity provided or the rewards for providing Liquidity, the LP tokens increases based on the pool, the amount of the LP increase is the amount of the rewards, when withdrawing the Liquidity provided, the LP token created is the lock and the rewards calculator for providing Liquidity.

Earn SWAP Stake SWAP- BNB-LP	SWAP Earned 0.0 0 USD	APR 35.16%	Total staked 645 SWAP- BNB-LP	Ends in 100,224,417 blocks	Deposit Fee 2%	Transfer Fee 0%	Withdrawal Lockup 72 Hour(s)	Hide ^
---	------------------------------------	----------------------	--	--------------------------------------	--------------------------	---------------------------	--	---------------

Max. stake per user: 250 SWAP-BNB-LP

Ends in: 100,224,417 blocks

Connect Wallet

SAFESWAP Mobile Application

The Safeswap Application released with the capability to connect wallets with the app and use the whole functions of safeswap platform in one place, not a wallet but yet a decentralized app with much more than capabilities.

Roadmap Q1 2022

SafeSwap Services

Defi Platform

One of the implementation as a services Safeswap offers, is a DEFI supported by safeswap sponsoring DeFi platforms for projects want to launch their TOKENS, COINS, or a whole DeFi Platform or projects, as a subsidiary under the management of Safeswap.finance, Safeswap.online.

SafeSwap Tree Plan

Supporting the world environment by planting trees all over the world, [Safeswap by its Tree Plan](#) with the help of some of the leading Environmental supporting organizations are collaborating to make the earth greener, and to help the world become more efficient energically by supporting the CO2 movement and the climate change movement, Safeswap planning to plant 1,000,000+ Trees over the world with the Ecology organization on the next few years.

Safe Audit

Safe Audit runs the [AUDIT.SC](#) services, one of the most reliable costly and executed by professionals on the blockchain, Auditing smart contracts of the many blockchain available and providing wide range of auditing reports services, Project teams KYC's (KYCT), and other auditing report services related.

Marketing BSCN

[BSCN](#) is aiming to become the leading media coverage platform around the Binance Smart Chain Ecosystem. With a strong focus towards Content Quality, Decentralized platforms, Hot topics in the market, Informative and education sources and guidance in how to be more aware around unreliable crypto projects.
